

HSS Countersink Drill Bit Set

This high-speed steel countersink drill bit set is designed for creating countersunk holes with either a 90° or 60° countersink angle. It features multiple cutting edges for efficient and precise material removal and is available in various sizes with different surface treatments.

Product Overview

High-Performance HSS Countersink Set

This set of high-speed steel (HSS) countersink drill bits is engineered for precision material removal and creating clean countersunk holes. Featuring four or more cutting edges, these tools ensure efficient operation and long-lasting durability. Available in multiple configurations, they are suitable for a variety of industrial drilling applications requiring either 60° or 90° angles.

Technical Specifications

Surface Treatment

Titanium Coated • Tin Coated

Material High-Speed Steel (HSS)

Countersink Angles 60°, 90°

Cutting Edges e4

Dimensions and Sizing

Standard Dimensions

Flute Diameter (mm)	Shank Diameter (mm)	Total Length (mm)
12.5	8	50
16	10	60
20	10	60
25	10	65
