Product Overview

High-Performance Step Drill Set

This HSS step drill set is engineered for precision drilling across various materials, including sheet metal and plastic. Featuring a versatile stepped design, these bits allow for creating multiple hole diameters with a single tool, streamlining your workflow. The durable high-speed steel construction, combined with a three-spiral flute design, ensures clean, accurate holes with minimal burr for professional results in electrical, plumbing, and automotive applications.

Technical Specifications

Drilling Range

16 mm Minimum Diameter	30.5 mm Maximum Diameter
----------------------------------	------------------------------------

Material	High-Speed Steel (HSS)
Flute Type	Three spiral flute
Finish	Bright Finish
Coating	Yes

Applications

Industry Applications

- Electrical work
- Plumbing
- Automotive repair

Compatible Materials	Sheet Metal, Plastic
-----------------------------	----------------------
