Overview

High-Performance HVAC Gas Control

The JL-7810 series is a professional-grade brass gas valve specifically engineered for HVAC&R systems. Featuring a durable brass body and a high-visibility yellow lever handle, it ensures smooth operation and a secure shut-off for gas flow control. This valve is designed for long-lasting reliability and consistent performance in demanding industrial and commercial environments.

Technical Specifications

Key Features

- Lever handle for easy operation
- Secure shut-off capability
- High-visibility yellow handle for identification
- Corrosion-resistant brass construction

Model Number	JL-7810
Body Material	Durable Brass
Primary Application	HVAC, HVAC&R, Gas Flow Control
