

HVAC Brass Safety Valve with Threaded Connection

This safety valve is designed for HVAC and refrigeration applications. Constructed from brass, it features a threaded connection and a red adjustment cap for setting the pressure limit.

Product Overview

Professional HVAC Safety Solution

This brass safety valve is specifically engineered for HVAC&R applications to ensure optimal system safety. It features a robust design capable of automatically releasing pressure when limits are exceeded, effectively protecting your infrastructure from overpressure damage. Designed for ease of use, it includes a threaded connection for seamless installation in professional systems.

Technical Specifications

Connection Size	3/4
Material	Brass
Adjustment Cap Color	Red

Features

Key Benefits	Overpressure Protection, Threaded Installation, HVAC&R Compatible, Automatic Release
