

HVAC Condensate Removal Pump

This vibration mask pump is a specialized water pump designed for HVAC&R applications. It effectively removes condensate from air conditioning and refrigeration systems, preventing water damage and maintaining optimal system performance.

Overview

Professional HVAC Condensate Solution

The VM80 vibration mask pump is a specialized unit engineered for reliable water removal in HVAC and refrigeration systems. Designed to prevent water damage and ensure optimal performance, this pump focuses on longevity and robust operation. Its unique engineering minimizes noise and vibration, making it an ideal choice for both residential and commercial environments seeking a quieter operational experience.

Technical Specifications

Durability

- Robust construction
- Long service life
- Vibration masking technology

Application

HVAC, Refrigeration, Condensate Removal

Noise & Vibration

Yes
