

HVAC Damper Hardware Kit

This hardware kit is designed for HVAC damper systems. It allows for manual adjustment of the damper position to control airflow within ductwork.

Product Overview

HVAC Damper Hardware Kit

This comprehensive damper hardware kit is designed for precision airflow control within HVAC ductwork systems. The set includes essential components such as a damper quadrant, lever arm, and necessary fasteners to ensure secure and reliable damper positioning. Engineered for durability and ease of installation, this kit provides a complete solution for maintaining efficient ventilation and climate control setups.

Technical Components

Included Components

- Damper quadrant
- Lever arm
- Threaded fasteners
- Flat washer
- Wing nut

Product Markings

RC

Primary Application

HVAC Ductwork, Airflow Control, Ventilation Systems
