

HVAC Fin Straightener Comb

This versatile tool efficiently straightens fins on air conditioning and refrigeration units. Featuring multiple fin spacing options, it is compatible with a wide range of fin densities.

Product Overview

Professional Fin Straightening Solution

The HVAC Fin Straightener Comb is a versatile tool engineered for HVAC&R professionals to efficiently restore bent or damaged fins on air conditioning and refrigeration units. Featuring a compact 4-inch design, it includes six distinct fin spacing settings to ensure compatibility with a wide range of fin densities. This durable tool helps maintain optimal airflow and improves the overall efficiency of cooling systems in both residential and commercial applications.
