

HVAC Gas Pressure Regulator

This gas pressure regulator ensures consistent gas pressure, enhancing system efficiency and safety. It is constructed from durable materials and features multiple ports for versatile connection options.

Product Overview

Precision Gas Regulation

This HVAC gas pressure regulator is engineered for reliable performance in gas distribution systems, specifically designed for small-scale users. It functions as both a closing regulator and a filter regulator to ensure consistent pressure stability. Built with durable materials like die-cast aluminium and reinforced nylon, this unit is suitable for a wide range of industrial and commercial applications.

Technical Specifications

Outlet Pressure Setting Ranges

- 16-60 mbar
- 20-70 mbar
- 60-200 mbar

Gas Compatibility	Non-aggressive gases of the 3 families (dry gas)
Max Working Pressure	1 bar
Min Working Pressure	0.1 bar

Environmental & Materials

Operating Temperature

-15 °C

Min Temp

60 °C

Max Temp

Materials	Die-cast aluminium, Nylon 30% glass fibre, NBR rubber
-----------	---

Compliance

Certifications

CE • ISO
