

HVAC Pressure Reducing Valve

This pressure reducing valve is designed for HVAC&R systems to automatically reduce and regulate fluid pressure. It ensures consistent downstream pressure, protecting sensitive equipment and optimizing system efficiency.

Product Overview

HVAC Pressure Reducing Valve

This pressure reducing valve is specifically engineered for HVAC&R systems to automatically regulate fluid pressure. By ensuring consistent downstream pressure, it plays a vital role in protecting sensitive equipment and optimizing overall system performance. It is designed for robust performance when controlling water or glycol solutions in both heating and cooling applications.

Technical Specifications

Connection Size	1/2 inch
Compatible Fluids	Water, Glycol Solutions
System Application	Heating, Cooling, HVAC&R
Installation	Threaded connection
