

HVAC Pressure Reducing Valve

This pressure reducing valve automatically reduces and regulates fluid pressure in HVAC&R systems. Constructed from durable brass, it features an adjustable screw for precise pressure control.

Product Overview

Professional HVAC Pressure Control

This pressure reducing valve is engineered to automatically regulate fluid pressure within complex HVAC&R systems. Its robust brass construction ensures long-term durability and reliable performance under consistent load. By utilizing a top-mounted adjustment screw, operators can achieve precise downstream pressure control to prevent system damage and optimize overall efficiency.

Technical Specifications

Key Features

- Automatic pressure regulation
- Versatile multi-port installation
- Compact design for space efficiency
- Overpressure protection

Body Material	Brass
Adjustment Type	Top-mounted screw
Suitable Media	Water, Compressed Air, HVAC&R Fluids
