Product Overview

Professional HVAC Stop Valve

These high-quality stop valves are engineered specifically for demanding HVAC&R applications requiring precise flow control. Constructed from durable brass for long-term performance, the valves feature standard CxC connections designed for seamless integration with copper piping systems. Built with green manufacturing principles, this solution provides professional reliability and efficiency for heating and plumbing installations.

Technical Specifications

Available Configurations

Product Code	Size Specification
Y00041	1/2" x 1/2"
Y00042	3/4" x 3/4"

Connection Type	CxC
Material	Brass

Certifications & Quality

Quality Compliance	Green Manufacturing, Industry Standard Compliant
