Product Overview

Professional HVAC Diagnostic and Repair Solution

This comprehensive diagnostic and repair tool kit is specifically engineered for refrigeration and air conditioning maintenance. The set includes a manifold gauge system, tube cutting and flaring equipment, and specialized adapters designed for evacuation and refrigerant charging. Housed in a durable carrying case, it provides technicians with an efficient and organized solution for servicing compressors and system piping in industrial and professional environments.

Kit Variations

Available Kit Models

- VTB-5B
- VTB-5B-II
- VTB-5B-III

Technical Features

Key Components

Manifold Gauge Set, Color-coded Hoses, Tube Cutter, Flaring Tool, Deburring Tool, Vacuum Pump Adapter

Applications

Professional Applications

HVAC Diagnostics • Refrigerant Charging • System Evacuation • Compressor Maintenance • Pipe Servicing
