

HVAC Temperature Control Ball Valve

This temperature ball valve is designed for HVAC systems to regulate temperature. It features durable construction and certifications including CE, UL, RoHS, and ISO 9001:2000.

Product Overview

Precise HVAC Temperature Control

This thermostatic radiator valve is designed for self-regulating control of hot water heating systems. By adjusting the flow of hot water to the radiator, it allows users to set and maintain the desired room temperature efficiently. The valve is built for long-lasting performance in professional HVAC applications, helping to optimize energy usage while ensuring reliable climate regulation.

Technical Specifications

Regulation Range	28 °C
Nominal Pressure	PN10
Coupling Dimension	M30x1.5mm

Performance Metrics

Operating Metrics

95 °C Max Medium Temp	50 °C Temp Interval
