Product Overview

High-Performance HVAC Vacuum Pump

This professional-grade vacuum pump is designed for efficient air evacuation and reliable system maintenance in refrigeration and air conditioning units. Available in versatile single-stage and dual-stage configurations, the unit ensures optimal vacuum levels through robust engineering and precise construction. Built for durability and ease of use, it serves as an essential tool for HVAC technicians performing installation and repair work.

Key Performance Metrics

Performance Overview

1.5 CFM

Flow Rate 50Hz

0.25 HP

Motor Power

25 microns

Ultimate Vacuum

Technical Specifications

VP215 Model Specs

Feature	Specification
Stage	Dual Stage
Flow Rate 50Hz	1.5 CFM / 42 L/min
Flow Rate 60Hz	1.8 CFM / 50 L/min
Inlet Port	1/4" Flare
Oil Capacity	180 ml
Weight	6 kg

Product Compatibility

Available Configurations

SC-1.0A, SC-1.5A, SC-2.0A, SC-2.5A, SC-3.0A, SC-4.0A, SC-5.0A
