

HVAC Water Circulation Centrifugal Pump

This high-efficiency centrifugal pump is designed for HVAC&R applications, specifically for water circulation. It features a robust construction for durability and long service life.

Product Overview

High-Efficiency HVAC Circulation

This high-efficiency centrifugal pump is specifically engineered for demanding HVAC&R water circulation applications. Built with robust materials to ensure long service life, it provides reliable performance for a variety of fluid handling requirements. Its durable construction makes it an ideal solution for professionals seeking consistent operation in commercial and industrial water systems.

Technical Specifications

Construction

Robust Design • Long Service Life

Primary Application

HVAC, Water Circulation, Refrigeration

Pump Design

Centrifugal
