

HVLP Automotive Paint Spray Gun

This high-volume, low-pressure (HVLP) spray gun is designed for fine finishing and automotive painting. It features adjustable fluid and air controls for precise material atomization and consistent spray patterns.

Product Overview

Professional HVLP Spraying Performance

This HVLP (High Volume Low Pressure) spray gun is designed for fine finishing and precision automotive painting. It excels at repairing small areas of metal surfaces and is fully compatible with modern water-based paints. Featuring a durable metal body and a gravity-feed system, it provides consistent atomization for professional-grade results across various coatings like lacquers and stains.

Technical Specifications

Spray Technology

HVLP

Application Scope

Automotive Repair, Small Area Metal Refinishing, Water-based Paint, Lacquer, Stain

Body Material

Durable Metal

Feed Type

Gravity-feed

Operational Requirements

Adjustable Settings

- Fluid control
- Air control

Source

Compressed Air
