Product Overview

Professional HVLP Spraying Performance

This HVLP (High Volume Low Pressure) spray gun is engineered for superior atomization, making it an ideal choice for applying waterborne and primer paints. Featuring a durable aluminum body and corrosion-resistant components, it ensures long-term reliability in demanding environments like automotive refinishing and woodworking. The ergonomic design and precision-engineered air cap provide smooth operation and exceptional control for high-quality finishes.

Technical Specifications

Optimal Working Pressure

3.5 bar

Min Pressure

4.5 bar

Max Pressure

Available Nozzle Sizes

1.4mm, 1.7mm, 2.0mm

Cup Capacity

600 ml

Construction & Materials

Material Composition

- Aluminum gun body
- Stainless iron nozzle and needle
- Copper air cap

Surface Finish

Chrome

Key Features

Core Advantages

- 15-hole copper air cap for superior atomization
- Corrosion-resistant nozzle and needle components
- Innovative, ergonomic trigger design
- Solvent-resistant air valve (compatible with banana oil cleaning)

Suitable Applications

Primer Paint • Waterborne Paint • Automotive Refinishing • Woodworking
