

HW190F(D)/P Engine for Industrial Equipment

This robust engine is designed for various industrial applications, offering reliable and efficient performance. Its features include a high-capacity fuel tank, an easy start system, and a low emission design, ensuring consistent power output.

Overview

Robust Industrial Engine

The HW190F(D)/P is a reliable engine engineered for consistent power output in demanding industrial environments. Designed with efficiency in mind, it features a low-emission profile and a high-capacity fuel tank to support extended operation. Its compact and lightweight architecture allows for seamless integration into a wide range of machinery, including generators and water pumps.

Technical Specifications

Model Number	HW190F(D)/P
Key Features	High-capacity fuel tank, Easy start system, Low emission design, Compact design

Applications

Suitable Applications

- Generators
- Water pumps
- Industrial equipment

Performance

Maintenance & Durability

Long-lasting performance • Minimal maintenance
