Hybrid Bicycle with Fenders

This bicycle features a hybrid design suitable for both road and light trail use. It is equipped with a lightweight frame, front and rear fenders, and a multi-speed drivetrain.

Overview

Versatile Hybrid Performance

This hybrid bicycle is engineered for riders who demand versatility across both urban pavement and light trail environments. Featuring a lightweight frame and a reliable multi-speed drivetrain, it balances efficiency with comfort for daily commutes or weekend adventures. Complete with integrated front and rear fenders, this bike is ready for various weather conditions right out of the box.
