

Hybrid Tractor for Agriculture and Industry

This hybrid tractor is suitable for a variety of industrial and agricultural applications. It combines electric and combustion engine power to reduce emissions and improve fuel efficiency.

Overview

Versatile Hybrid Performance

The JYL020-H is a high-performance hybrid tractor engineered for demanding agricultural and industrial environments. By integrating electric and combustion power, this machine optimizes fuel efficiency while significantly reducing operational emissions. Designed with operator comfort and durability in mind, it features a robust chassis, protective canopy, and intuitive controls to handle diverse worksite challenges.

Technical Specifications

Powertrain	Hybrid (Electric & Combustion)
Suitable Applications	Agriculture, Industrial

Design & Features

Key Features

- Protective canopy
- Ergonomic seating
- Front bumper
- Integrated headlights
- Side mirrors

Color Scheme

Gray • Yellow
