

Hydraulic Anchor Windlass and Mooring Winch

Hydraulic anchor windlass and mooring winch available in 14/16/17.5 sizes. It delivers efficient and controlled operation for anchor deployment and retrieval, as well as secure mooring.

Product Overview

Robust Marine Anchoring and Mooring Solution

This hydraulic anchor windlass and mooring winch is engineered for heavy-duty marine applications, ensuring reliable performance in demanding maritime environments. It is designed to handle both anchor deployment and retrieval, as well as secure mooring operations for various vessel types. Built for durability and long service life, this equipment provides efficient, controlled operation to meet rigorous safety and performance standards.

Technical Specifications

Mooring Performance Metrics

8 kn

Mooring Pull

12 m/min

Mooring Speed

| | |
|---------------------------|-----------------------|
| Supported Chain Diameters | 14 mm, 16 mm, 17.5 mm |
| Hydraulic System Power | 5.5 kW |
| Drum Capacity | 11 * 100 |
