

# Hydraulic Anchor Windlass Mooring Winch

Hydraulic anchor windlass and mooring winch with a chain diameter of 44/46/48 mm. It has a mooring pull of 60kN.

## Product Overview

### Marine-Grade Hydraulic Winch System

This robust hydraulic anchor windlass and mooring winch is engineered for demanding marine environments, providing reliable anchor handling and efficient mooring capabilities. The system features a high-torque hydraulic motor and a corrosion-resistant finish, ensuring durability and long-term performance. Designed for various vessel types, it offers precise control for safe and effective maritime operations.

## Performance Metrics

### Key Operational Metrics

**60 kN**

Mooring Pull

**12 m/min**

Mooring Speed

**37 kW**

Hydraulic Power

## Technical Specifications

### Capacity and Load Details

Chain Diameter (mm)	Working Load (kN)
44	82.3
46	89.9
48	97.9

Drum Capacity: 26 mm diameter x 200 m length

Working Speed: 9 m/min

## Compliance
