

Hydraulic Anchor Windlass Mooring Winch 76KN

This hydraulic anchor windlass and mooring winch is designed for marine applications. It facilitates secure anchoring and mooring with a 76KN pulling capacity and a durable drum for wire rope storage.

Overview

High-Performance Marine Winch Solution

This hydraulic anchor windlass and mooring winch is engineered for heavy-duty marine applications, providing reliable performance in demanding environments. Designed for efficiency and safety, it ensures secure anchoring and mooring operations for various vessel types. The robust construction is complemented by certification from major classification societies, meeting international standards for maritime equipment.

Performance Metrics

Key Performance Metrics

76 KN

Pulling Capacity

125 KN

Mooring Pull

90

Hydraulic Pressure

Technical Specifications

Working Load Range	245.5 KN to 258.6 KN
Chain Diameter Range	76 mm to 78 mm
Mooring Speed	15 m/min
Drum Capacity	! 36 * 200mm * m

Compliance & Quality

Steel Grades

- Grade Two Steel
- Grade Three Steel

Available Accessories

- Anchor Chains (12.5mm to 60mm)
- Ship Mooring Equipment
- Durable Storage Drum

Classification Society Certifications

CCS, LR, GL, RS
