

Hydraulic Bottle Jack

Hydraulic bottle jacks are used for lifting heavy objects using hydraulic fluid and a pump mechanism. These jacks are characterized by their lifting capacity, height range, and base dimensions.

Product Overview

Hydraulic Bottle Jack

This hydraulic bottle jack is designed for heavy-duty lifting applications, providing reliable force for vehicles and industrial equipment. It utilizes a precision hydraulic pump mechanism to ensure smooth, controlled lifting and safe operation. The compact, durable design includes a release valve for precise lowering, making it an essential tool for professional maintenance and repair environments.
