Product Overview

Compact Hydraulic Lifting Solution

This heavy-duty hydraulic bottle jack is engineered for high-performance lifting in space-constrained environments. Featuring a low-profile design, it allows for easy access under vehicles and machinery where standard jacks may not fit. Built with durable materials, it provides reliable lifting power and a stable base, making it an essential tool for automotive repair, construction, and industrial maintenance applications.

Technical Specifications

Lifting Capacity

5 TON

Capacity

Application Areas

Automotive Repair, Construction, Industrial Use

Safety Guidelines

Safety Instructions

- Use only on hard, level surfaces
- Always center the load
- Do not adjust screw beyond maximum height
- Do not use as a support device
- Inspect before each use
