Product Overview

Professional Hydraulic Jack

Designed for automotive repair, tire changes, and general garage use, this hydraulic jack offers a robust lifting solution for vehicles and heavy equipment. Constructed with durable, all-welded steel and featuring a rust-resistant finish, it ensures long-term reliability in demanding environments. Safety is prioritized through a built-in overload protection valve and a bypass device that prevents over-pumping, making it a dependable tool for professional workshops.

Warranty

2 Years

Technical Specifications

Lifting Capacity

10 T

Max Capacity

Maximum Height

495 mm

Minimum Height

135 mm

Jack Type

Hydraulic Jack

Safety & Compliance

Safety Features

- Bypass device (prevents over-pumping)
- Built-in safety valve (overload protection)

Certifications

CE, SGS, ANSI, ASME

Construction & Design

Mobility

Large steel casters • Swivel casters • Lightweight design

Material

All-welded steel frame with cast iron support arms
