

Hydraulic Clutch and Brake Master Cylinder

This hydraulic cylinder is a critical component for both clutch and brake systems. It converts mechanical force from the pedal into hydraulic pressure, which is then transmitted to the clutch slave cylinder or brake calipers.

Product Overview

Hydraulic System Performance

These hydraulic clutch and brake master cylinders are precision-engineered to convert mechanical force from the pedal into reliable hydraulic pressure. Designed for specific classic automotive applications, they ensure consistent performance for either braking or clutch disengagement systems. Built for durability and accurate fitment, these components are essential for maintaining vehicle responsiveness and safety.

Compatibility

Part Reference Guide

Part Number	Compatible Models
460171	204, 504, 505
460180	504, 505
460126 / 460178	404, 505
460160	504
460182	404
209518 / 209515 / 209517	504, 505, 604

Compatible Vehicle Models

Peugeot 204, Peugeot 404, Peugeot 504, Peugeot 505, Peugeot 604

Technical Details

System Application

Hydraulic Clutch • Hydraulic Brake

Construction Materials

Durable polymer/plastic body with rubber seals and metallic actuator components
