

Hydraulic Compression Baling Machine

This hydraulic compression baling machine efficiently compresses materials for packaging. It utilizes hydraulic power to apply consistent pressure, creating compact and secure bales.

Overview

Industrial Hydraulic Compression Baling Machine

This high-performance hydraulic compression baling machine is engineered for efficient material compaction, optimizing storage and transportation logistics. Designed for industrial reliability, it features robust construction and adjustable pressure settings to handle diverse materials like textiles and fibers. With multiple capacity configurations available, this equipment ensures high throughput, minimized downtime, and consistent performance for demanding production environments.

Technical Specifications

Performance & Dimensions

Model	Power (KW)	Dimensions (mm)	Template Size (mm)	Weight (kg)
30T	7.5	1520x1140x3030	900x600x900	1650
50T	11	1520x1300x3200	900x650x1000	2250
80T	15	1600x1300x3100	1000x650x1000	2500
100T	18	1600x1400x3450	1000x700x1050	3500

Available Capacities

30T, 50T, 80T, 100T
