

Hydraulic Crawler Excavator with LCD Display

The hydraulic crawler excavator is equipped with a reliable Cummins engine and a high-quality hydraulic system. Its electronic monitoring and control system includes a multifunctional LCD display.

Product Overview

Robust Crawler Excavator

This crawler excavator is engineered for demanding construction and excavation tasks. Featuring a high-performance hydraulic system, the machine ensures precise control over the boom, arm, and bucket for maximum efficiency. The durable undercarriage and track system provide reliable stability and mobility across uneven and challenging terrains.
