

Hydraulic Crimping Tongs

These hydraulic tongs are designed for heavy-duty crimping and compression tasks. The tool features a robust steel construction and a hydraulic mechanism for efficient crimping power.

Product Overview

Professional Hydraulic Crimping Tongs

These heavy-duty hydraulic crimping tongs are engineered for reliable terminal compaction in demanding industrial environments. The tool utilizes a powerful hydraulic mechanism to ensure consistent and high-quality compression results. Designed with durability in mind, it features a robust steel construction that stands up to rigorous daily use.

Technical Specifications

Compression Capacity	150 mm ²
Minimum Capacity	25 mm ²

Physical Dimensions

Weight	4 kg
Overall Length	625 mm

Features

Supported Die Sizes

- 35
- 50
- 80
- 95

Primary Application	Terminal compaction
