

Hydraulic Crimping Tool

This hydraulic crimping tool is designed for securely joining metal components. It features a hydraulic mechanism for applying consistent pressure.

Product Overview

Professional Hydraulic Crimping Solution

This hydraulic crimping tool is designed for reliable terminal press-joint applications. Engineered for durability and ease of use, it provides consistent pressure for secure metal component joining. Its robust construction makes it an essential tool for demanding electrical, plumbing, and automotive tasks.

Technical Specifications

Compression Capacity

120 mm²
Max Capacity

10 mm²
Min Capacity

Physical Dimensions

Attribute	Value	Unit
Length	625	mm
Weight	4	kg

Features

Design Highlights

- Hydraulic mechanism for consistent pressure
- Interchangeable dies for versatile connector sizes
- Long handles for enhanced leverage
- Rubber grips for improved comfort

Application Suitability

Electrical, Plumbing, Automotive
