Product Overview

High-Performance Hydraulic Solutions

This hydraulic cylinder is engineered for heavy-duty industrial, construction, and agricultural applications. Built with robust construction and precision machining, it offers reliable linear force and precise control. The unit is designed for extended service life, featuring high-pressure seals and chrome-plated rods for enhanced durability.

Technical Specifications

Design Features

Heavy-duty • Corrosion resistant • Robust construction

Cylinder Type

Double-acting

Construction Materials

Steel, Chrome-plated rod, High-pressure seals

Service & Manufacturing

Manufacturing Capabilities

- Standard series supply
- Custom OEM manufacturing
