

Hydraulic Decoiler Uncoiler 1-12T

This hydraulic decoiler uncoiler handles metal coils ranging from 1 to 12 tons. It is designed to efficiently uncoil materials for rolling mill applications.

ADDITIONAL IMAGES

Product Overview

Hydraulic decoiler uncoiler machine designed for metal forming applications, featuring an integrated control panel for adjusting unwinding speed and tension.

Industrial Hydraulic Decoiler

This hydraulic decoiler and uncoiler machine is engineered for efficient and reliable handling of metal coils in heavy-duty industrial environments. Featuring a robust steel frame and a precise hydraulic expansion system, it facilitates smooth, controlled material feeding for rolling mills and metal forming production lines. The system is designed to accommodate various coil sizes and weights, ensuring consistent performance and minimal material waste.

Technical Specifications

A heavy-duty hydraulic decoiler and uncoiler machine designed for metal forming applications, featuring a robust steel frame and precision control panel.

Heavy-duty hydraulic decoiler uncoiler machine designed for handling and un-winding metal coils, featuring hydraulic tension control and an adjustable mandrel.

Load Capacity	12 T
Minimum Capacity	1 T

Service & Support

Installation & Training

- On-site training at factory
- Instruction manuals provided
- Video tutorials
- Technician dispatch available

Warranty	One year guarantee for the whole machine
Technical Support	Email, Skype, Whatsapp, Wechat, Phone Call
Support Hours	24 hours
