

Hydraulic Floor Jack for Vehicle Lifting

This heavy-duty hydraulic floor jack is designed for lifting vehicles. It features durable steel construction and smooth hydraulic lifting mechanism, along with swivel casters for easy maneuverability.

Product Overview

Professional Vehicle Lifting Solution

This heavy-duty hydraulic floor jack is engineered for demanding automotive repair and maintenance environments. Constructed with high-grade steel, it provides a stable and reliable platform for lifting vehicles securely. Its design incorporates smooth hydraulic mechanisms and swivel casters, ensuring precise control and effortless maneuverability around the workshop floor.

Technical Specifications

Mobility

- Swivel casters for 360-degree rotation
- Easy maneuverability

Build Material	Durable Steel
Lifting System	Hydraulic

Applications

Usage Areas	Automotive Repair, Maintenance Tasks, Workshop
-------------	--

Key Performance Features

Key Attributes

Heavy-Duty • Industrial Grade • Smooth Operation
