

# Hydraulic Floor Jack

This hydraulic floor jack is designed for efficient and reliable lifting. It features heavy-duty steel construction for durability and a smooth, controlled lowering mechanism for safe operation.

## Overview

### Professional Hydraulic Floor Jack

The TH33502 hydraulic floor jack is engineered for high-performance lifting in demanding environments such as automotive repair shops and industrial facilities. Constructed from heavy-duty steel, it provides exceptional durability and stability for a variety of vehicles and equipment. The design focuses on operational safety with a controlled lowering mechanism and a wide base for reliable balance during use.

## Performance

### Lifting Speed

**1**

Extraordinary Lifting Speed

## Construction

Material	Heavy-duty steel
Design Features	Wide Base, Controlled Lowering Mechanism

## Applications

### Suitable Environments

- Automotive repair shops
- Garages
- Industrial facilities
