

Hydraulic Gas Spring for Office Chairs

Hydraulic gas springs are designed for smooth height adjustment in office chairs. They feature a black cylinder and silver telescopic piston, available in various lengths and stroke ranges.

Product Overview

Premium Office Chair Gas Spring

This hydraulic gas spring is engineered specifically for office chair applications, offering reliable height adjustment and structural stability. Featuring a robust black cylinder body and a polished silver telescopic piston, it is designed for both aesthetics and long-term durability. These springs are available in a variety of stroke ranges and lengths, ensuring compatibility with diverse chair designs and user ergonomic requirements.

Technical Specifications

Surface Finish

Black Powder Coated Cylinder • Silver Chrome-plated Piston

Performance Features

- Smooth vertical height adjustment
- Long-lasting performance
- Universal office chair compatibility
- High-pressure hydraulic seal

Material Composition

Heavy-duty Steel, Hydraulic Fluid, High-pressure Gas
