

Hydraulic Hand Pump

This hand-operated hydraulic pump is designed for a range of hydraulic tools. It delivers varying output pressures and oil capacities.

Product Overview

Professional Hydraulic Hand Pump Range

This range of high-performance hydraulic hand pumps is engineered for diverse industrial crimping and pressing applications. Designed with robust construction and precise output pressures, these units provide reliable hydraulic force for split-unit tools. Available in multiple configurations, they serve as the essential power source for heavy-duty professional maintenance and installation tasks.

Technical Specifications

Hydraulic Pump Performance

Model	Max Pressure (Kg/cm ²)	Oil Volume (CC)	Mechanism
CFP-800	700	400	Treading
CP-700	700	900	Hand making
CP-630	630	1100	Hand making
CP-390	700	380	Hand making
CP-180	700	350	Hand making

Key Performance Metrics

1100 CC

Max Oil Capacity

700 Kg/cm²

Max Standard Pressure

Application Support

Compatible Tool Systems

Split-unit Hydraulic Pliers, Crimping Applications, Pressing Applications
