

Hydraulic Hose Crimper

This hydraulic hose crimper is designed for assembling hydraulic hoses. It features a robust construction and a powerful hydraulic system to ensure precise and consistent crimping.

Product Overview

Professional Hydraulic Hose Assembly

This hydraulic hose crimper is engineered for reliable and precise assembly of hydraulic hoses in demanding industrial environments. Featuring robust construction and a powerful hydraulic system, it ensures consistent crimping results for a wide variety of hose sizes and fittings. With an intuitive control panel for parameter adjustments and integrated safety features, this machine is an essential tool for workshops and garages requiring high-quality hose maintenance.

Technical Specifications

Key Features

- Robust construction
- Powerful hydraulic system
- Adjustable crimping parameters
- Integrated safety protections
- Interchangeable die range

Ideal Environments

Workshops, Garages, Industrial Settings
