

Hydraulic Hose Crimping Machine

This hydraulic hose crimping machine is designed for various industrial applications, ensuring consistent and reliable connections. It features a control panel for precise adjustment of crimping parameters and a foot pedal for hands-free operation.

Overview

Industrial Hydraulic Hose Crimping Solution

This high-performance hydraulic hose crimping machine is engineered for precision and efficiency in industrial hose assembly. With a robust 2000KN crimping force and the capability to process between 700 and 850 pieces per hour, it is designed to meet demanding production schedules. The system supports a wide range of hose sizes from 1/4" to 2", making it a versatile tool for various hydraulic applications.

Performance Metrics

Crimping Force

2000 KN
Crimping Force

Production Capability

850 pcs/hour

Technical Specifications

Crimping Range	10-87mm
Supported Hose Sizes	1/4" - 2"
Maximum Opening	33 mm
Dies Included	9 sets
Control System	MS/UC

Power and Dimensions

Motor Power Options

- 4KW
- 5KW

Machine Dimensions	760 x 560 x 800 mm
---------------------------	--------------------

Machine Weight	265 kg
