

Hydraulic Log Splitter

This hydraulic log splitter is designed for efficient and safe wood splitting. It features a robust hydraulic system capable of generating significant splitting force.

Product Overview

Industrial-Grade Hydraulic Log Splitter

This high-performance hydraulic log splitter is engineered for safe and efficient wood processing in professional settings. Featuring a robust hydraulic system and a durable steel construction, the unit provides reliable splitting force to handle demanding workloads. Its user-centric design includes a two-hand safety control system and an integrated log cradle to ensure operator safety and operational efficiency.

Operational Metrics

Key Performance Indicators

4 Tons

Splitting Force

Design & Construction

Design Features	Heavy-duty steel, Two-hand safety control, Integrated log cradle, Portable wheel design
Build Quality	Reinforced heavy-duty steel frame designed for long-lasting industrial performance.
