

Hydraulic Metal Forming Press

This heavy-duty hydraulic press is designed for metal forming applications. It features a robust frame, a powerful hydraulic cylinder, and an adjustable work table for precision and versatility.

Overview

Heavy-Duty Hydraulic Metal Forming Press

This industrial-grade oil hydraulic press is engineered for precision and reliability in demanding metal forming environments. Featuring a robust frame construction and a powerful hydraulic cylinder, it delivers consistent force for a wide range of tasks including pressing, bending, straightening, and assembly. With an adjustable work table and an integrated safety cage, this unit combines operational versatility with essential operator protection for manufacturing and fabrication facilities.

Technical Specifications

Key Features

- Robust heavy-duty frame
- High-performance hydraulic cylinder
- Adjustable work table
- Integrated safety cage
- Dedicated hydraulic power unit

Model Identifier

ZMDY30/25-10/25

Application Suitability

Metal Forming, Pressing, Bending, Straightening, Assembly

Dimensional Data

Dimensional Overview

Dimension Reference	Description
A	Base Width
B	Side Width
C	Overall Height
D	Functional Depth
E / E1	Effective Height
I1	Internal Clearance Reference
