

Hydraulic Metal Shearing Machine

This hydraulic shearing machine is designed for precise and efficient metal cutting. It features a robust construction with a heavy-duty frame and hydraulic system for powerful shearing action.

Overview

Hydraulic Metal Shearing Machine

This hydraulic shearing machine is designed for efficient sheet metal manufacturing, offering high-quality cutting performance for both ferrous and nonferrous materials. It features a robust hydraulic drive system engineered to minimize bowing and twisting during the shearing process. With adjustable cutting angles and manual blade clearance settings, it provides the precision required for professional metal fabrication tasks.

Technical Specifications

Max Shearing Thickness	4.5 mm
Max Shearing Width	2000 mm
Shearing Angle	2 °
No. of Strokes	18 min
Motor Power	7.5 kW
Back Gauge	630 mm (manual)

Logistics & Dimensions

Weight (Net/Gross)

2900 kg
Net Weight

3150 kg
Gross Weight

Packing Size	285 x 116 x 185 cm

Equipment Details

Included Accessories

- Cutting blade
- Manual Back gauge

Compliance

CE, ISO
