

Hydraulic Metal Sheet Shear

This hydraulic shear is designed for cutting metal sheets with precision and efficiency. It features a robust construction, adjustable blade clearance and a hydraulic system for powerful cutting force.

Overview

Professional Hydraulic Metal Sheet Shear

The HGO31/6.35 Hydraulic Shear is engineered for precision and reliability in demanding industrial environments. Utilizing advanced hydraulic and electric systems, this machine is optimized for heavy-duty applications across the automobile, container, and electrical cabinet industries. It provides consistent cutting force for various metal types, including low-alloy, stainless, and spring steel.

Technical Specifications

Model Number	HGO31/6.35
Max Cutting Thickness	6.35 mm
Compatible Materials	Low-alloy steel, Stainless steel, Spring steel, General metal sheets

Features

Key Features

- Advanced hydraulic system
- Reliable electric control system
- Adjustable blade clearance
- Robust industrial construction
- Integrated safety features

Industry Applications

Automobile • Container Manufacturing • Electrical Cabinets • General Machine-Building • Light Industry
