

Hydraulic Metal Sheet Shearing Machine

This hydraulic shearing machine is designed for cutting metal sheets. It is used in industrial metal fabrication processes.

Overview

Industrial Hydraulic Shearing Solution

This hydraulic metal sheet shearing machine is engineered for precision and efficiency in industrial metal fabrication environments. Designed to handle robust cutting tasks, it features a durable construction with integrated safety guards to ensure operator protection. The machine is optimized for consistent performance, making it a reliable choice for professional workshops and manufacturing facilities requiring accurate sheet metal processing.

Technical Specifications

Cutting Capacity

8 mm

Max Thickness

3200 mm

Cutting Width

Machine Type

Hydraulic • Metal Shearing

Model Number

QC12Y-8 x 3200

Features

Safety and Control

- Integrated front safety guards
- Dedicated operator control panel
- Heavy-duty base construction
