

Hydraulic Multi-Boom Drill Jumbo

This robust machinery is designed for drilling in mining, tunneling, and construction environments. Featuring multiple drill booms and a heavy-duty chassis, it delivers precise control and high productivity.

Product Overview

High-Performance Drilling Solution

The Hydraulic Multi-Boom Drill Jumbo is a robust and versatile machine engineered for intensive drilling operations in tunneling, mining, and large-scale construction projects. It features multiple high-powered booms mounted on an all-wheel drive heavy-duty chassis to ensure superior mobility and stability on challenging, uneven terrain. With a sophisticated hydraulic system for precise control and an ergonomic cabin designed for operator safety and visibility, it delivers exceptional productivity and reliability in the most demanding work environments.

Technical Specifications

Drivetrain	All-wheel drive
Control System	Hydraulic Control, Feed Rate Management, Adjustable Rotation Speed, Impact Force Regulation

Safety & Ergonomics

Safety Systems

- Emergency stop mechanisms
- Protective guarding
- Ergonomic operator cabin
- High-visibility design

Performance Metrics

Core Capabilities

1 Hard Rock

Drilling Capacity

1 Multi-boom

Boom Configuration
