

Hydraulic Multi-Day Jack

This high-pressure hydraulic cylinder is designed for lifting heavy loads in industrial applications. It features a compact and robust construction suitable for use in confined spaces.

Product Overview

Industrial Hydraulic Lifting

The RMC-L Multi-Day Jack (RMC-1001L) is a high-performance hydraulic tool engineered for heavy-duty industrial lifting tasks. Featuring a compact and robust design, this unit is perfectly suited for use in confined spaces where precise and controlled lifting is required. Its durable construction ensures reliability during demanding maintenance, repair, and construction operations.

Performance Metrics

Operational Performance

100 T

Output Capacity

75 mm

Stroke

0.225 L

Oil Capacity

Dimensions

Dimensions & Physical Properties

Property	Measurement	Unit
Product Height	86	mm
Extended Height	163	mm
Bore Diameter	130	mm
Plunger Diameter	110	mm
Weight	15	kg

Technical Details

Effective Area	95 cm ²
Outside Dimensions	185 x 160 mm
