

Hydraulic Output Tractor Attachment

This hydraulic output is suitable for tractors ranging from 40hp to 60hp. It enables the use of implements requiring hydraulic power.

Overview

Versatile Agricultural Powerhouse

This hydraulic output tractor is designed for high-efficiency farming operations, supporting a power range from 40hp to 60hp. It features a sophisticated 16-shift transmission system and a reinforced 3-point suspension, making it ideal for demanding tasks like plowing, tilling, and harvesting. With adjustable wheel treads and a high-capacity lifting system, it offers the flexibility needed for diverse farmland conditions.

Performance Highlights

Performance Metrics

60 hp

Max Power

1.4 tons

Lift Capacity

16

Total Shifts

Transmission & Engine

Transmission System

- 12 forward shifts and 4 reverse shifts
- Engagement sleeve shift for gearbox and rear axle
- Double acting clutch for seamless implement operation
- Planetary reducer final drive structure
- Planetary reducer start motor

Engine Compatibility

Diesel Engine • National Famous Brands • 40hp-60hp Range

Hydraulics & Lifting

Lifting & Suspension

Feature	Specification
Lifter Type	Force buried (force, position, and floating control)
Cylinder Diameter	100mm
Lift Capacity	1.4 Tons
Suspension	Reinforced 3-point postposition
Tie Rod	Floating bottom tie rod

Power Take-Off (PTO)

PTO Speed Configurations

540/760 r/min, 540/1000 r/min, 760/1000 r/min

Chassis & Safety

Safety & Maintenance

- Enhanced night driving illumination system
- Front-mounted water tank strainer to prevent debris blockage
- Height-adjustable reinforced traction system
- Enclosed cab with air conditioning

Adjustable Wheel Tread

Yes
