

Hydraulic Pipe Cutter

This pipe cutter features a fast feed hydraulic design for efficient operation. The cutter delivers clean cuts with low noise and no sparking.

Product Overview

Professional Hydraulic Pipe Cutting Solution

This hydraulic pipe cutter is a robust and efficient tool engineered for precision pipe processing in industrial environments. It utilizes a high-speed cutting wheel driven by a reliable electric motor, complemented by a hydraulic cylinder that delivers controlled and consistent cutting force. Multiple integrated rollers ensure excellent stability and guidance for the pipe, resulting in clean, accurate cuts every time.

Technical Specifications

Stability System

- Multi-roller guidance
- Sturdy metal frame

Cutting Method	Electric-hydraulic hybrid with high-speed cutting wheel
Power System	Hydraulic cylinder

Safety and Compliance

Safety Equipment	Enclosed cutting wheel, Safety guard
