

Hydraulic Power Steering Rack and Pinion Assembly

This is a hydraulic power steering rack and pinion assembly. It is designed for 2WD right-hand drive vehicles and provides smooth, responsive steering.

Product Overview

High-Performance Steering Precision

This hydraulic power steering rack and pinion assembly is precision-engineered to deliver smooth and responsive handling for 2WD right-hand drive vehicles. Designed for optimal road feedback and durability, the unit ensures consistent steering performance under varying driving conditions. Each assembly comes fully equipped with essential components including tie rod ends and protective boots for a simplified, reliable installation process.

Technical Specifications

Drivetrain Compatibility

2WD

Steering Type	Hydraulic Power Steering
Steering Orientation	Right-Hand Drive (RHD)

Components and Durability

Included Components

- Steering rack assembly
- Tie rod ends
- Protective boots

Quality Standards	High-Durability Materials, Reliability Focused
