

Hydraulic Press for Plastic Molding

This hydraulic press is designed for molding and forming plastic materials. It features a robust frame with a vertical hydraulic cylinder and a control panel for adjusting pressure and cycle times.

Overview

High-Efficiency Hydraulic Press

This industrial-grade hydraulic press is engineered specifically for precision plastic molding and forming applications. Featuring a robust frame construction and a powerful vertically oriented hydraulic cylinder, it ensures consistent force application for demanding production environments. The integrated control panel allows operators to fine-tune pressure settings and cycle times, while the sliding table mechanism facilitates efficient material loading and unloading.

Technical Features

Machine Type	Hydraulic Press
Primary Application	Plastic Molding, Plastic Forming, Industrial Processing

Operational Details

Control System	Yes
Loading System	Sliding Table

Design & Build

Finish
Blue • Silver • Red Pressing Area

Frame Type	Robust Vertical Frame
